VET PARTNERSHIP FOR GREEN AND SMART ELECTRICITY IN BUILDINGS - VET4GSEB

The project **VET4GSEB** aims to transfer experience and good practices in the field of vocational education and training from European countries (Bulgaria and Turkey) to the other countries participating in the project, Albania, Ukraine, Armenia and Georgia. What is invaluable, however, is the sharing and knowledge of ideas between all partners.

VET4GSEB's goal is to equip VET providers with tailored solutions, training materials, tools and guidance so as to enable them to update and improve their training program and practices.

BACKGROUND

The targets and objectives set in the EU Energy Strategies and policies and those of the participating countries have led to changes in the labour market for designers and installers of "smart" applications and renewable energy systems in buildings. The sector needs professionals with new skills - not only knowledge and skills in the field of "smart" building installations and RES system, but also soft, interpersonal, entrepreneurial competences.

WE HAVE ACHIEVED SO FAR

We are excited to share the latest updates on our ongoing VET4GSEB projects. Here are our recent accomplishments:

1. Equipped professionals with the **necessary skills** for "smart" renewable energy applications and systems in buildings.
2. Provided **training** that combines **technical knowledge** of smart buildings and renewable energy systems.
3. Focused on developing essential **soft skills, interpersonal abilities, and entrepreneurial competencies.**
4. Ensured VET providers are prepared to meet the **growing demand** for well-rounded professionals in the sector.

Final Conferences in other partner countries will be organized during December 2024

Organization of Final Conferences

We are excited to announce the organization of the Final Conferences for the VET4GSEB project, where we will highlight our key activities and achievements. These events will showcase how we've supported VET providers in Bulgaria, Albania, Ukraine, Armenia, and Georgia with tailored training solutions in the construction and renewable energy sectors, focusing on the project's long-term impact and sustainability.

The VET4GSEB project **successfully** transferred **valuable experience** and best practices in vocational education and training from **European countries (Bulgaria and Turkey) to Albania, Ukraine, Armenia, and Georgia**. Our work will continue, with a strong focus on **sustainability**, ensuring that the skills and knowledge gained through the project are integrated into long-term training programs and can be adapted to **future industry demands**.
